CheckMate Security Features

We offer two base stock paper security levels both with significant security features included. **Level 1** is 24# MICR bond for the best value and **Level 2** is 24# security paper (*illustrated below*) for maximum security.

	LEVEL 1 24# MICR BOND	LEVEL 2 24# SECURITY BOND
--	--------------------------	------------------------------

- | | | |
|--|---|---|
| 1.) VOID PANTOGRAPH - The word VOID images when copied or scanned and is positioned per check 21 regulations | ✓ | ✓ |
| 2.) MICROPRINT SIGNATURE LINE - Type is readable under magnification - unreadable when copied or scanned. | ✓ | ✓ |
| 3.) PADLOCK ICON - Identifies and defines the multiple security features included. | ✓ | ✓ |
| 4.) CHECK WARNING BORDERS - Indicates that specific security features are protecting the check. | ✓ | ✓ |
| 5.) SECURITY BACK PRINTING - Original Document wording disappears when copied or scanned. | ✓ | ✓ |
| 6.) THERMOCHROMIC PADLOCK ICON - Security ink that fades when rubbed or exposed to heat. | ✓ | ✓ |
| 7.) COIN REACTIVE INK - Rub with a coin and the word VALID appears. | ✓ | ✓ |
| 8.) GHOST PADLOCK WATERMARK BACKER - Hold at an angle to view artificial watermark padlock icons. | ✓ | ✓ |
| 9.) CHEMICAL REACTIVITY - Check paper will stain if exposed to chemical solvents and bleaches. | ✓ | ✓ |
| 10.) TONER ADHESION - Special coating on paper to prevent the lifting or removal of laser printer toner. | ✓ | ✓ |
| 11.) FLUORESCENT FIBERS - Yellow fibers are visible only when check is exposed to a black light. | ✓ | ✓ |
| 12.) BLEED THROUGH MICR NUMBERS - MICR numbers bleed through back of sheet in red - \$ = extra cost. | ✓ | ✓ |
| 13.) BLEED THROUGH RED ARABIC NUMBERS - Arabic numbers bleed through back of sheet in red - \$ = extra cost. | ✓ | ✓ |
